Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 10 October 2011.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ An election was made by the applicant in response to a restriction requirement set forth during the interview on ____; the restriction requirement and election have been incorporated into this action.
- 4) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 5) ☒ Claim(s) 1-18 is/are pending in the application.
- 5a) Of the above claim(s) ____ is/are withdrawn from consideration.
- 6) ☐ Claim(s) ____ is/are allowed.

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over SINDERBY (WO 02/056818) in view of EULIANO et al. (US 7,425,201).

The Sinderby reference discloses a respiratory system (see Fig. 1) comprising a CPU 20 that acts as both a calculator and a controller for controlling a level of ventilation assist via ventilation tube 34 based on electrical signals from measurement probe 12 which measures or indicates a patient's inspiratory effort based on the comparison of the electrical signal to a desired threshold level. However, Sinderby fails to explicitly relate the measured signal to the fatigue of a respiratory muscle. Attention is further directed to EULIANO et al. which discloses another respiratory system which relates a patient's inspiratory effort, as derived from a measured signal, to the fatigue of a respiratory muscle for the reason of the avoidance of respiratory muscle fatigue and to stimulate a more natural breathing process (see col. 4, lines 13-28). Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the SINDERBY system to incorporate the relation of the measured inspiratory effort to the fatigue of a respiratory muscle (if not already) in view of the teachings of the EULIANO et al. to stimulate a more natural breathing process (see col. 4, lines 13-28).

In regard to claims 1-9, the method as claimed would be inherent during normal use and operation of the device or system derived by the combined teachings discussed above.

Response to Arguments

Applicant's arguments with respect to claims 1-18 have been considered but are moot in view of the new ground(s) of rejection.
